***Smallville*** is an American television series developed by writer-producers [Alfred Gough](#) and [Miles Millar](#), based on the [DC Comics](#) character [Superman](#) created by [Jerry Siegel](#) and [Joe Shuster](#). The series, initially broadcast by [The WB](#), premiered on October 16, 2001. After *Smallville*'s fifth season, [The WB](#) and [UPN](#) merged to form [The CW](#), the series' later United States broadcaster. *Smallville*, which ended its tenth and final season on May 13, 2011, follows [Clark Kent](#) ([Tom Welling](#)) in the fictional town of [Smallville, Kansas](#), before he becomes known as [Superman](#). The first four seasons focus on Clark and his friends in high school. After season five *Smallville* ventures into adult settings, eventually focusing on his career at the *[Daily Planet](#)* and introducing other [DC comic-book](#) [superheroes](#) and [villains](#).

Before the series' production, *[Bruce Wayne](#)*, chronicling the young protagonist's journey toward [Batman](#), was proposed first. Although that series failed to generate interest, it inspired *Smallville*. Series developers [Gough](#) and [Millar](#) pitched their "no tights, no flights" rule to the president of [Warner Bros. Television](#), reducing [Superman](#) to the bare essentials and examining what led [Clark Kent](#) to become the [Man of Steel](#). After seven seasons with the show, [Gough](#) and [Millar](#) departed with little explanation. *Smallville* was primarily filmed in and around [Vancouver, British Columbia](#), with local businesses and buildings substituting for [Smallville](#) locations. Most of the music for the first six seasons was composed by [Mark Snow](#), who incorporated elements of [John Williams](#)' musical score from the *[Superman](#)* film series. In [season seven](#), [Louis Febre](#) (who worked with [Snow](#) from the beginning) became the series' primary composer.

*Smallville* was generally positively received when it began. Former *[Superman](#)* star [Christopher Reeve](#) expressed approval for the series, making two guest appearances before his death. The [pilot episode](#) set a ratings record for a [WB](#) debut, with 8.4 million viewers. Over ten seasons the series averaged about 4.34 million viewers per episode, with [season two](#) the highest-rated at 6.3 million. By the end of its run,

*Smallville* passed *Stargate SG-1* as the longest-running North American science-fiction series.<sup>[2]</sup> Since its first season, the series received accolades ranging from *Emmys* to *Teen Choice Awards*. *Smallville* spawned a series of young-adult novels, a DC Comics bimonthly comic book, soundtrack recordings and series-related merchandise. All ten seasons are available on DVD in regions 1, 2 and 4. In April 2012, it continued in comic-book form with a storyline resuming shortly after the *series finale*, and ended in November 2014.

The regular cast is introduced in *season one*, with storylines involving a villain deriving power from *kryptonite* exposure. The one-episode villains were a plot device developed by Gough and Millar.<sup>[3]</sup> *Smallville*'s first season primarily dealt with *Clark Kent*'s coming to terms with his alien origin and the revelation that his arrival on Earth was connected to the death of *Lana Lang*'s parents.<sup>[4]</sup> After the first season the series had fewer villain-of-the-week episodes, focusing instead on individual-character story arcs and exploring Clark's origins.<sup>[5]</sup> Major storylines include Clark's discovery of his *Kryptonian* heritage and *Lex Luthor*'s escalating conflict with his father, *Lionel*.<sup>[6]</sup> The disembodied voice of Clark's father, *Jor-El*, is introduced; he communicates to Clark through his spaceship, setting the stage for plots involving his role in fulfilling Clark's earthly destiny.<sup>[7]</sup> In a *fourth-season* arc Clark, instructed by *Jor-El*, searches for three Kryptonian stones which contain the knowledge of the universe and form his *Fortress of Solitude*.<sup>[8][9]</sup> Clark battles *Brainiac* in his attempts to release the Kryptonian criminal *General Zod*,<sup>[10]</sup> and must capture (or destroy) other escaped *Phantom Zone* criminals.<sup>[11]</sup> His cousin *Kara* arrives,<sup>[12]</sup> and *Lex Luthor* discovers Clark's secret.<sup>[13]</sup> The *eighth season* introduces *Davis Bloome* (*Smallville*'s version of *Doomsday*), and *Tess Mercer* replaces the departing *Lex Luthor*. *Justin Hartley* becomes a series regular as *Oliver Queen* (*Green Arrow*) after being a recurring guest

in season six.<sup>[14]</sup> In the ninth season Major Zod (Callum Blue) and other members of Zod's military group are revived (without their Kryptonian powers) by Tess Mercer,<sup>[15]</sup> and their efforts to regain their powers are the season's central conflict. The final season revolves around Clark's attempts to lose his doubts and fears and become the hero he is meant to be, while confronting his biggest challenges: the coming of Darkseid and the return of Lex Luthor.<sup>[16]</sup>

## Cast

---

- Tom Welling plays Clark Kent, a young man with superhuman abilities who tries to find his place in life after discovering that he is an alien and uses his powers to help those in danger. Clark's season-one problems include his inability to share his secret and his desire for a normal life. After months of scouting, Welling was cast as Clark.<sup>[17]</sup> Although David Nutter had to convince his manager that the role would not hurt the actor's film career to persuade Welling to read the pilot script, after reading the script Welling agreed to audition.<sup>[3]</sup>
- Kristin Kreuk plays Lana Lang, the girl next door. Grieving the loss of her parents, she has empathy for everyone and feels connected to Clark.<sup>[18]</sup> Kreuk was the first to be cast, after Nutter saw an audition tape the actress had sent.<sup>[3]</sup> Although she left the series after the seventh season,<sup>[19]</sup> she returned for five episodes in season eight as a guest star.<sup>[20]</sup>
- Michael Rosenbaum plays Lex Luthor, a billionaire's son sent to Smallville to run the local fertilizer plant. After Clark saves his life, they become fast friends.<sup>[21]</sup> As the series progresses, Lex's friendship with Clark crumbles until they consider themselves enemies. The role was difficult to cast;<sup>[4]</sup> Michael Rosenbaum auditioned twice and, feeling that he did not take his first audition seriously enough, outlined a two-and-a-half-page scene indicating where to be funny, charismatic or menacing.<sup>[22]</sup> His second audition went so well that he was hired.<sup>[4]</sup> Rosenbaum left the show after seven seasons,<sup>[19][23]</sup> reprising his role for the series finale.<sup>[24]</sup>
- Allison Mack plays Chloe Sullivan, one of Clark's best friends, who is in love with him (although her feelings are not reciprocated).<sup>[25]</sup> Editor of the school newspaper, her journalistic curiosity and desire to "expose falsehoods" and "know the truth"<sup>[26]</sup> create tension with her friends (especially when she investigates Clark's past).<sup>[27]</sup> After learning about *Smallville* from casting director Dee Dee Bradley, Mack considered auditioning for Lana Lang but auditioned twice for Chloe Sullivan.<sup>[26]</sup> The character was created just for the series,<sup>[4]</sup> and was intended to have an "ethnic background" before Mack was hired.<sup>[26]</sup> She has since appeared in the comic book.<sup>[28]</sup>
- Sam Jones III plays Pete Ross, another best friend of Clark's and the first person to whom Clark voluntarily tells his secret.<sup>[29]</sup> Although he is in love with Chloe,<sup>[30]</sup> he does not admit it because of the Clark-Lana-Chloe love triangle already in place.<sup>[31]</sup> Ross was written out of the series at the end of season three, but made a guest appearance in season seven. Jones was the last of the series regulars to be cast, with Gough and Millar seeing him four days before they began filming the pilot.<sup>[31]</sup> In the comics Ross is Caucasian, but the producers chose to cast Jones (who is African-American).<sup>[31]</sup>
- Annette O'Toole plays Martha Kent, Clark's adoptive mother. She and her husband, Jonathan, give Clark wise advice about coping with his increasing abilities. In season five Martha takes a state-senate seat,<sup>[32]</sup> and in season six she leaves the show.<sup>[33]</sup> Although Cynthia Ettinger was originally cast as Martha Kent, during filming everyone (including Ettinger) realized that she was

Although Welling initially refused to audition for the role of Clark Kent, he changed his mind after reading the script for the pilot episode.

not right for the part.<sup>[4]</sup> O'Toole was committed to the television series *The Huntress* when Ettinger filmed the original pilot. Around the time the creators wanted to recast Martha Kent when *The Huntress* was canceled, allowing O'Toole to join the cast.<sup>[34]</sup> The actress had played Lana Lang in *Superman III*.<sup>[35]</sup>

- John Schneider plays Jonathan Kent, Clark's adoptive father, who goes to great lengths to protect his son's secret; according to Schneider, Jonathan is "perfectly willing to go to jail, or worse, to protect his son."<sup>[36]</sup> Schneider was written out of the show in the series' 100th episode, with Jonathan dying of a heart attack on the night of his election victory.<sup>[37]</sup> Millar and Gough wanted a recognizable face for *Smallville*; they were happy to cast Schneider as Jonathan because he was known as Bo Duke from *The Dukes of Hazzard*, which Gough saw as adding to the belief that Schneider could have grown up running a farm.<sup>[4]</sup>
- Eric Johnson plays Whitney Fordman, Lana's boyfriend in season one, who becomes jealous of Clark and Lana's budding friendship and hazes him.<sup>[21]</sup> He reconciles with Clark before joining the Marines and going to Afghanistan.<sup>[38]</sup> Although Whitney was written out of the show in the first-season finale, he made cameo appearances in the season-two episode "Visage" (where it is disclosed that he was killed in action) and the season-four episode "Façade" (during a flashback to Clark's freshman year of high school). Johnson, who auditioned for Lex and Clark before he was cast as Whitney,<sup>[39]</sup> was pleased that the writers gave his character a hero's exit.<sup>[40]</sup>
- John Glover plays Lionel Luthor, Lex's father. Lionel is responsible for the Kents' adoption of Clark without legal ramifications or questions about his origins.<sup>[27]</sup> Glover tried to make Lionel seem to try to "toughen [Lex] up", and saw the character as a rich, powerful businessman who was disappointed in his son.<sup>[41]</sup> Lionel was created for *Smallville* to parallel the Kents and as an "experiment in extreme parenting."<sup>[4]</sup> A recurring first-season guest, Glover became a series regular from seasons two to seven until Lionel was murdered by Lex near the end of the seventh season.<sup>[42]</sup> Lionel returns in a parallel-universe version, also portrayed by Glover, during the final season in a recurring role.<sup>[43]</sup>
- Jensen Ackles plays Jason Teague, Lana's love interest, in season four. He follows Lana to Smallville from Paris, taking a job as the school's assistant football coach,<sup>[44]</sup> but is fired when their relationship comes to light. By the end of the season, it is disclosed that he was working with his mother to track the three Kryptonian stones of knowledge.<sup>[45]</sup> Before he was cast as Jason, Ackles was second in line for the role of Clark Kent.<sup>[46]</sup> Although he received top billing for season four and was contracted for season five, he was written out of the show in the season-four finale because of his commitment to *Supernatural*.<sup>[47]</sup>
- Erica Durance plays Lois Lane, Chloe's cousin who comes to Smallville to investigate Chloe's supposed death<sup>[8]</sup> and stays with the Kents. Durance, a recurring guest in season four, became a series regular. The producers wanted to bring Lois Lane to the series, and Chloe's supposed death in the season-three finale provided the opportunity. Durance was cast three days before filming began; although she could initially appear in only four episodes, according to the film division of Warner Bros., after negotiations her character was cleared for more appearances.<sup>[48]</sup>
- Aaron Ashmore plays Jimmy Olsen, Chloe's photographer boyfriend who works at the *Daily Planet*. Ashmore, a recurring guest in season six, became a regular cast member in season seven. He called his casting a welcome surprise: "I auditioned for [the role] and I put myself on tape. I hadn't heard anything, and a couple of weeks later, all of the sudden (sic), I got the call saying, 'You're going to Vancouver to start shooting Smallville.' It's a dream come true, really."<sup>[49]</sup> After three seasons on the series (two as a regular), Ashmore's character was killed off. Although Ashmore's Jimmy Olsen was murdered, he said his character was not the "real" Jimmy Olsen, his real name revealed to be Henry James Olsen. Jimmy's younger brother, who appears briefly in the season-eight finale, is intended to be the Jimmy who works with Clark and Lois.<sup>[50]</sup> Ashmore returns as the younger Jimmy in the series finale.

- Laura Vandervoort plays Kara, Clark's Kryptonian cousin. Sent to look after Kal-El (Clark), she was in suspended animation for eighteen years. When the dam confining Kara's ship broke in the season-six finale, "Phantom", she was set free. She has Clark's abilities, including flight.<sup>[51]</sup> At the end of the seventh season, Kara was trapped in the Phantom Zone. Although Vandervoort did not return regularly for the eighth season,<sup>[52]</sup> she had guest appearances to wrap up her storyline in season eight's "Bloodline" and season ten's "Supergirl" and "Prophecy".<sup>[53]</sup>
- Justin Hartley plays Oliver Queen (Green Arrow), the CEO of Queen Industries and leader of a small group of superheroes. Hartley, a recurring guest in the sixth and seventh seasons, became a series regular in season eight<sup>[14]</sup> and was the producers' first choice to play Oliver Queen. He was designed to shake up Clark and Lois in season six and to give Clark an alternate view of how to fight crime.<sup>[54]</sup>
- Samuel Witwer plays Davis Bloome in season eight. A "charismatic" paramedic struggling with inner darkness,<sup>[55]</sup> Davis Bloome is *Smallville*'s version of Doomsday (the only character to kill Superman). Davis would come to resemble his comic-book counterpart over the course of the season.<sup>[56]</sup> Brian Peterson said that with Michael Rosenbaum's departure, the new executive producers were looking for a villain "as great as Lex" and Doomsday fit the bill.<sup>[57]</sup>
- Cassidy Freeman plays Tess Mercer, Lex's handpicked successor as LuthorCorp CEO in season eight.<sup>[55]</sup> Her name is an homage to two *Superman* characters, Eve Teschmacher and Mercy Graves.<sup>[58]</sup> Freeman described her character as "fierce", "fun", and "intelligent", with finding Lex her primary season-eight goal. Tess believes that Clark will be able to help her.<sup>[59]</sup> In the season-ten episode "Abandoned", it is disclosed that her birth name is Lutessa Lena Luthor and she is Lionel's illegitimate daughter.<sup>[60]</sup>
- Callum Blue plays Zod, an early version of the criminal from Krypton who was sent to the Phantom Zone prison. His character is first mentioned in season five, when Brainiac uses Lex's body as a vessel for Zod's spirit, and he appears in a Kryptonian sphere in the season-eight finale.<sup>[61]</sup> *Smallville*'s executive producers called this incarnation "Major Zod" (as opposed to the typical "General Zod"), and in season nine "the venomous side of Zod rises because he experiences a few key betrayals with our beloved characters".<sup>[62]</sup>

Erica Durance was cast as Lois Lane days before fourth-season filming began, and her appearance was initially restricted by the film division of Warner Bros. Studios.

## Production

---

### Development

Tollin/Robbins Productions originally wanted to do a series about a young Bruce Wayne, but the feature-film division of Warner Bros. decided to develop an origin movie for Batman and did not want to compete with a television series.<sup>[4]</sup> In 2000 Tollin/Robbins approached Peter Roth, president of Warner Bros. Television, about developing a series on a young Superman. That year, Alfred Gough and Miles Millar developed a pilot based on the film *Eraser*. After watching the pilot, Roth approached Gough and Millar about developing a pilot about a young Superman;<sup>[4]</sup> the two made a "no tights, no flights" rule that Clark would not fly or wear the Superman suit during the series.<sup>[63]</sup>

Chloe Sullivan (Allison Mack) was created for the series.

Gough and Millar wanted to strip Superman to his "bare essence", exploring why Clark Kent became the Man of Steel.<sup>[4]</sup> They felt that because they were not comic-book fans or familiar with the universe, they would have an unbiased approach to the series. Gough and Millar learned about the characters, researching the comics and choosing what they liked.<sup>[4]</sup> They pitched their idea to The WB and Fox on the same day.<sup>[64]</sup> A bidding war between the networks followed, with The WB committing to thirteen episodes.<sup>[64]</sup>

Although Roth, Gough and Millar knew the show would be action-oriented, they wanted to reach *7th Heaven*'s "middle America iconography". To create atmosphere, the team decided the meteor shower bringing Clark to Earth would be the ironic foundation of the show. The primary source of his life on Earth and the super-powered beings Clark must fight, it would take away the parents of the girl he loves and start Lex Luthor down a dark path. Roth appreciated Clark's

conflict in dealing with the fact that his arrival caused so much pain.<sup>[4]</sup>

The creators also had to address why Lex Luthor would socialize with young people. They created a loneliness in the character which they felt would drive him to reach out to the teenagers,<sup>[4]</sup> a loneliness echoed in Clark and Lana.<sup>[3]</sup> Gough and Millar wanted a parallel to the Kents and created Lionel Luthor, Lex's father, whom they saw as conducting an "experiment in extreme parenting."<sup>[4]</sup> They wanted a younger Kent couple, to be involved in Clark's life and help him on his journey.<sup>[3]</sup> Chloe Sullivan (another character created for the series) was considered the "outsider" the show needed to ensure that someone would notice the strange happenings in Smallville<sup>[4]</sup> rather than a "precursor to Lois Lane".<sup>[3]</sup>

*Smallville* has been described by Warner Bros. as a from-the-roots reinterpretation of Superman mythology. Since the November 2004 reacquisition of Superboy by the Siegel family, a copyright infringement dispute has arisen over ownership of the fictional town of Smallville and a claimed similarity between Superboy and *Smallville*'s Clark Kent. According to the Siegel heirs, "*Smallville* is part of the Superboy copyright" (which they hold).<sup>[65]</sup>

## Crew changes

On April 3, 2008, after seven seasons with the series, Gough and Millar announced that they were leaving *Smallville*. The developers thanked the cast and crew for their work, acknowledging that they never stopped fighting for what they saw as "their vision" of the show. A reason for their departure was not provided.<sup>[66]</sup> Gough and Millar were replaced as showrunners by Todd Slavkin, Darren Swimmer, Kelly Souders and Brian Peterson. All began writing for the series at the start of the second season, and were executive producers by the seventh season. On February 6, 2009, after one season, the *L.A. Times* confirmed that Swimmer and Slavkin would take over the new CW series Melrose Place and not return for *Smallville*'s ninth season; Souders and Peterson would continue as showrunners.<sup>[67]</sup> On July 24, 2009, it was reported Tom Welling was a co-executive producer of the series.<sup>[68]</sup> On March 26, 2010, *The Hollywood Reporter* disclosed that Millar, Gough and co-producer Tollin/Robins Productions filed a lawsuit against Warner Bros. and The CW charging that Hollywood's "vertical integration" cost Millar and Gough millions of dollars. The suit claimed that Warner Bros. failed to "maximize profits" in marketing *Smallville*, misrepresented production costs and sold the show to foreign

markets at "well below the value of the series", not specifying the amount of compensation sought by the plaintiffs.<sup>[69]</sup> In a May 20, 2010 press release from The CW, Tom Welling was appointed an executive producer for *Smallville*'s tenth season.<sup>[70]</sup>

## Filming

The series was produced at BB Studios in Burnaby, British Columbia. Although production was initially planned for Australia, Vancouver had more of a "Middle America landscape". The city provided a site for the Kent farm, doubled for Metropolis, provided a cheaper shooting location and was in the Los Angeles time zone.<sup>[4]</sup> *Smallville*'s Main Street is a combination of two locations in the town of Merritt and Cloverdale.<sup>[3]</sup>

Cloverdale welcome sign

Vancouver Technical School doubled as the exterior for *Smallville* High, since the school had the "mid-American largess" wanted by the filmmakers<sup>[3]</sup> and was in keeping with Millar's idea that *Smallville* should be the epitome of "Smalltown, USA".<sup>[21]</sup> Templeton Secondary School was used for *Smallville* High's interior.<sup>[71]</sup> During season one, the production team repainted most of Templeton in *Smallville* High's red and yellow and distributed large *Smallville* High Crows logos; so much of the school was painted that it adopted red and yellow as its school colors. The students became accustomed to the film crew (which had to shoot when school was in session), and when a class was dismissed the crew stepped aside so the students could move the equipment to get to their lockers for the next class.<sup>[72]</sup>

The Kent farm is a working farm in Aldergrove. Owned by the Anderlinis, the crew painted their home yellow for the show.<sup>[64]</sup> Exterior shots of Luthor Mansion were filmed at Hatley Castle in Victoria.<sup>[3]</sup> The interiors were filmed at Shannon Mews in Vancouver, also the set for the *Dark Angel* pilot and the film *Along Came a Spider*.<sup>[3]</sup> Clova Cinema, in Cloverdale was used for exteriors of the Talon, *Smallville*'s coffeehouse.<sup>[73]</sup>

The story is told from Clark's point of view, so color schemes and camera selection illustrate how he interprets his environment. When he is safe at home, the colors are "warm and gentle" earth tones and the camera movement is "very gentle". When Clark is keeping his secret and not in danger, the lighting is more neutral and the camera more mobile. When danger is present, the lighting becomes colder and the camera is handheld to allow for more "extreme angles". In Metropolis "clean, hard-lined architecture" predominates, with blues, purples and reflective metals the dominant scheme. The same concept is used for the characters; Lex usually has a "glass, steel background", and Lionel has a white or "clinical blue" background. Lex typically wears black, grey and "cool tones" (purples and blues). Clark is represented by red, yellow and blue, similar to the traditional Superman costume, and "All-American" red, white and blue.<sup>[74]</sup> From season two onward, Entity FX produced all of the visual effects for *Smallville*, including the view of the Metropolis skyline.<sup>[75]</sup>

## Music

Composer Mark Snow worked with producer Ken Horton to create *Smallville*'s score. Snow composed music as he watched the picture, and tweaked his performance when he reviewed his initial recordings. He then sent the music to the producers, who sent it back for recomposition if needed. Individual episodes have their own soundtrack, comprising one (or more) songs. Jennifer Pyken and Madonna Wade-Reed of Daisy Music looked

for songs for the soundtrack. Their choices were discussed by the producers, who decided which songs they wanted and secured their rights. Although Snow said it initially seemed odd to combine two types of music on a "typical action-adventure" television show, "the producers seem to like the contrast of the modern songs and the traditional, orchestral approach to the score".<sup>[76]</sup>

The main *Smallville* theme was not composed by Snow, although he composed opening themes for other shows (including *The X-Files*). The series' opening music is "Save Me" by Remy Zero. Snow composed the closing-credits music, which was intended as *Smallville*'s theme. During the first two seasons, the closing-credits music was a potential theme for the series (before "Save Me" was selected); it was more "heroic" and "in-your-face". Snow was told during season two that the closing credits needed new music, since the show had evolved and the existing music was no longer suitable, and he created a new, toned-down score with a more "melodic" sound.<sup>[72]</sup> Snow has also reworked music from the previous *Superman* films. John Williams' musical score for the Krypton sequence in the opening credits of *Superman* was used in season two's "Rosetta" (which featured a guest appearance by Christopher Reeve) and several times in the season-two finale. To save money Snow recorded his version of Williams' score, since using the original version would have required the team to pay Williams' orchestra.<sup>[77]</sup>

In an interview with Randall Larson on May 23, 2008 Snow said that he would not be returning to *Smallville*, citing the joint workload of *Smallville* and *Ghost Whisperer*, but would return for *Ghost Whisperer*. Reminiscing about his work on the show, Snow said that much of the music had not changed during the series and agreed with Larson that it was "more [about] maintaining the heroic concept and the mythology than progressing through specific changes".<sup>[78]</sup> Louis Febre, who worked closely with Snow from the beginning, became the sole composer for *Smallville* in season seven. Febre said that since he began composing for *Smallville* there was a shift to "thematic development" in the score, paralleling the characters' growth: "As Clark grew emotionally and intellectually more complex, I found a need to comment musically on his growth, and as he drew closer to his Superman persona, it became obvious that a 'Superman' theme would be required."<sup>[79]</sup>

The creative team had a number of opportunities to try different music to enhance an episode's storyline. Pyken and Wade-Reed chose and coordinated music on the show when Snow and Febre's scores were not used.<sup>[80]</sup> In season three's "Slumber", producer Ken Horton wondered if they could get a band to provide music for the entire episode. During a breakfast meeting with the music department of Warner Bros. R.E.M. was suggested, and Pyken and Wade-Reed immediately saw an opportunity to connect the episode's featured band with its story (which revolved around REM sleep).<sup>[81]</sup> That season, Al Gough wanted to use Johnny Cash's cover of the Nine Inch Nails song "Hurt" for the final scene of "Shattered" (when Lionel Luthor looks at Lex through a one-way mirror at Belle Reve sanitarium) as soon as he read the episode's script. Cash died while Wade-Reed was trying to obtain the rights for the song and his heirs, believing that the song's use in the episode would honor his memory, gave *Smallville* the rights.<sup>[82]</sup>

I get a locked picture on a videotape which syncs up with all my gear in the studio. I write the music, finish it up, mix it up, send it through the airwaves on the internet, and the music editor puts it in. They call up usually and say, 'Thank you, well done.' Sometimes they call and say, "Thank you, not so well done —can you change this or that?" I say "Sure," make the changes and send it back.<sup>[76]</sup>

—Mark Snow, on composing music for each episode

For season three's "Resurrection" and "Memoria", songs were chosen as symbolism for the characters. In "Resurrection", The Rapture's "Infatuation" was used during a scene with Lex and Lana to symbolize the question, "Are we ever going to figure out what these two people think of each other?"<sup>[83]</sup> For "Memoria" Gough wanted to use Evanescence's "My Immortal" for the episode's final scene, telling Wade-Reed that he saw the song as being about mothers. In that scene Clark tells Martha that his first childhood memory was of his mother, Lara.<sup>[84]</sup>

Season three's "Velocity" provided the music editors with the opportunity to use hip-hop, rarely used in the series. The episode, similar to *The Fast and the Furious*, focused on Pete. Wade-Reed heard of British hip-hop artist Dizzee Rascal, and was the first person in the United States to secure the rights to Rascal's album.<sup>[85]</sup> Greg Beeman directs episodes, and sometimes scenes, with particular songs in mind. For "Vortex" in season two, he used Coldplay's "In My Place" for the final scene.<sup>[86]</sup> In the season-two finale "Exodus", Beeman directed the scene where Lana shows up at the Kent barn before Lex's wedding to Matthew Good's "Weapon". The lyrics speak of an angel and devil "by my side", and Beeman timed specific shots to the song's lyrics.<sup>[77]</sup>

## Broadcasting

---

*Smallville* premiered at 9:00 pm on Tuesday,<sup>[87]</sup> October 16, 2001 on The WB.<sup>[88]</sup> For the next five seasons the series aired on The WB, moving from Tuesday at 9:00 pm to Wednesday at 8:00 pm and eventually to Thursday at 8:00 pm. In 2006, before the start of *Smallville's* sixth season, it was announced The WB and UPN would merge into The CW and the network reported that the series would continue in its lineup.<sup>[89]</sup> During its seventh season, the series aired in Canada a day earlier than it did in the United States.<sup>[90]</sup> On May 21, 2009 it was announced that *Smallville's* ninth season would move to Friday at 8:00 pm, considered the "death slot" for television programs.<sup>[91][92]</sup> By the end of its tenth season it was the longest-running science-fiction TV show in the United States, breaking the record held by Stargate SG-1.<sup>[93]</sup> Syndication rights became available in 2011, and TNT began airing episodes on October 3, 2011.<sup>[94]</sup> *Smallville* began streaming on Hulu on October 1, 2016.<sup>[95]</sup>

## Reception

*Smallville* set a WB record as its highest-rated series debut, with 8.4 million viewers tuned in for the pilot.<sup>[96]</sup> Its premiere set a WB record for adults aged 18–34 and finished first among viewers aged 12–34, with Warner Bros. president Jordan Levin crediting the series with invigorating the network's Tuesday-night lineup. *Smallville* appeared on the cover of *Entertainment Weekly* as one of five new shows to watch.<sup>[97]</sup> After its first season, the series was sixth on the Parents Television Council's 10-best list of broadcast programs.<sup>[98]</sup> Levin, acknowledging early concerns that *Smallville* had become a villain of the week series, said that season two would introduce "smaller mini-arcs over three to four episodes" and become less of a "serialized show".<sup>[99]</sup> According to Gough, although each succeeding season relied more on season-long story arcs, an occasional villain-of-the-week story was necessary. The villain-of-the-week stories were more harshly criticized by fans of the Superman mythology, but Gough wanted to please them and The WB's general audience (teenagers who preferred villain-of-the-week stories over episodes focusing on the Superman mythology).<sup>[100]</sup>

Christopher Reeve, star of the *Superman* films, expressed his approval of the show:

I was a little bit skeptical when I heard about [*Smallville*] at first, but I must say the writing, the acting, and the special effects are quite remarkable. In 1977, a big stunt scene would have taken us a week to film—it's pretty impressive what they are able to do with computers and effects technology today on a weekly TV show. It gives it a lot more production value and inventiveness than I thought I was going to see when I first heard about the series. I think the show is doing a really good job following the mythology, and Tom is doing a good job following the tradition.<sup>[101]</sup>

According to MTV's Karl Heitmueller, *Smallville*'s Clark Kent was a better representation of the original material and remained "true to the heart of the story" by showing Clark's selflessness and his struggle between his desires and his obligations. However, Heitmueller wrote that the series would have a difficult time addressing why no one in Smallville (including Lex Luthor) recognized Clark when he put on the suit.<sup>[102]</sup> TV Guide's Michael Schneider called it one of the best examples of a superhero adaptation for television,<sup>[103]</sup> but Christopher Hooton of *Metro* wrote that *Smallville* was a story which did not need to be told: "No-one bothered to follow Bruce Wayne's tedious years spent manufacturing microchips before he became Batman, so why must we endure a decade of flannel shirt-wearing Clark Kent bucking hay?"<sup>[104]</sup>

## Other media

---

*Smallville* has generated other media and spinoffs, from young-adult novels and comic books to Internet-based mini-episodes with characters from the series. It influenced the British TV series, Merlin.<sup>[156]</sup>

## Literature

Two series of novels have been published since *Smallville*'s second season. A series of eight young-adult novels was published by Aspect Publishing from October 2002 to March 2004, and a second series of ten young-adult novels was published by Little, Brown Young Readers from October 2002 to April 2004. A bimonthly comic-book series, which often tied into the series, was also published.

### Young adult novels

Three novels were published on October 1, 2002: one by Aspect and two by Little, Brown Young Readers. The Aspect novel (*Smallville: Strange Visitors*) was written by Roger Stern, with Clark and his friends trying to uncover the truth about two religious con men who set up shop in Smallville and use kryptonite in their spiritual seminars to rob the townspeople.<sup>[157]</sup> Little, Brown Young Readers first published *Arrival* by Michael Teitelbaum, chronicling the series' pilot.<sup>[158]</sup> The second novel (*See No Evil*, by series writers Cherie Bennett and Jeff Gottesfeld) follows Dawn Mills, a young actress who wants to attend Juilliard. Dawn, who can become invisible, wants to get revenge on the people who have been talking behind her back but is stopped by Clark.<sup>[159]</sup> *See No Evil* was one of the original storylines for season one's "Shimmer".<sup>[160]</sup>

On November 1, 2002 Aspect published Alan Grant's *Smallville: Dragon*, about an ex-convict who assumes the abilities and appearance of a dragon after he is exposed to kryptonite in a cave; the mutation drives him to try to kill everyone who testified against him. In the novel, Clark is hypnotized into believing that he is a normal teenager with no special abilities.<sup>[161]</sup> A month after the publication of Grant's novel Bennett and Gottesfeld wrote Little, Brown Young Readers' *Flight*, about a young girl (Tia) who Clark discovers has wings. He and his friends believe that Tia is being abused by her father, and teach her to overcome her fear of flying so she can find her mother.<sup>[162]</sup> *Flight* (like *See No Evil*) was a planned episode, but the crew was uncertain that they could get the flying effects right and the idea was scrapped.<sup>[163]</sup> Nancy Holder wrote the third novel in the Aspect series. Published on January 1, 2003, *Hauntings* follows Clark and his friends as they investigate a ghostly presence in a Smallville house.<sup>[164]</sup> Little, Brown Young Readers then published *Animal Rage* by David and Bobby Weiss, about animal-rights activist Heather Fox (who can change into any animal she touches). Heather

uses this ability to harm people who hurt animals until Clark discovers it and stops her.<sup>[165]</sup> Aspect published Dean Wesley Smith's *Whodunit*, in which Clark, Chloe, Lana and Pete investigate the murder of a boy and his sister while Lex tries to decide whether to ransom his kidnapped father or try rescuing Lionel himself.<sup>[166]</sup>

Little, Brown Young Readers published the next two books in April and June 2003. The first, *Speed*, was written by Cherie Bennett and Jeff Gottesfeld. The second, *Buried Secrets*, was written by Suzan Colon. In *Speed*, a boy uses an hourglass his father gave him for his birthday to stop time and commit hate crimes without being caught. Clark stops him before he disrupts a local multicultural festival.<sup>[167]</sup> In *Buried Secrets* Clark and Lex fall in love with a mind-reading substitute Spanish teacher, jeopardizing their friendship.<sup>[168]</sup>

On September 9, 2004 Aspect published Diana G. Gallagher's *Shadows*, about a girl and her father who move to Smallville; the father creates murderous monsters. Jonathan Kent assumes that the deaths are related to LuthorCorp, creating tension with his son. Clark discovers the truth to prove Lex's innocence, stopping the creatures before they can kill again.<sup>[169]</sup> Colon returned to write *Runaway*, in which Clark runs away to the city and lives with other homeless teenagers; he falls in love with one of the girls before returning home.<sup>[170]</sup> In *Smallville: Silence* by Nancy Holder, the characters investigate zombies in town.<sup>[171]</sup> Little, Brown Young Readers published its eighth book, *Greed*, by Bennett and Gottesfeld in which Clark and his friends take summer jobs as counselors at a camp for disadvantaged youths. When a boy falls into Crater Lake, he develops the ability to foretell the future and Lionel tries to exploit this. Pete also tries to exploit Clark's abilities by tricking him into playing in a basketball game and betting on the outcome.<sup>[172]</sup>

Alan Grant returned to write *Curse*, about a gravedigger who unleashes a 150-year-old curse onto Smallville and Clark's attempts to put things right.<sup>[173]</sup> On February 1, 2004 Little, Brown Young Readers published Suzan Colon's *Temptation*, where Clark uses red kryptonite in an attempt to impress Lana and Chloe when they are infatuated with a French exchange student.<sup>[174]</sup> Aspect published its final novel on March 1, 2004. Written by Devin K. Grayson, *City* follows Clark and Lex on a trip to Metropolis. In the city, they are caught between the Japanese mafia and a secret agent who thinks he has found an alien.<sup>[175]</sup> In Little, Brown Young Readers' final novel, "Sparks" by Cherie Bennett and Jeff Gottesfeld, Chloe is hit by kryptonite sparks from a fireworks display. The sparks make Chloe the desire of every man, but when they wear off an admirer kidnaps her and she is rescued by Clark.<sup>[176]</sup>

## Comic books

*Smallville's* first venture into comics was "Elemental", a one-off story by Gough and Millar which appeared in *TV Guide* during the series' first season and set in that period.<sup>[177]</sup> Before the start of season two, DC Comics published a one-off comic based on the series. Entitled *Smallville: The Comic*, it has two stories. The first, "Raptor" by Mark Verheiden and Roy Martinez, is about an abused boy who mutates into a raptor (thanks to kryptonite) and tries to get revenge on the Luthor family. Michael Green and John Paul Leon wrote "Exile and The Kingdom", with insight into why Lex remains in Smallville after his father offers him a position in Metropolis at the end of season one.<sup>[178]</sup> DC Comics then began publishing a bimonthly comic with stories about *Smallville* characters. Writer and script coordinator Clint Carpenter called the comic-book line a companion to the series rather than a non-canonical version. According to Carpenter, the comic-book line expands on events in the series (such as season-ending cliffhangers) and gives "additional depth" to characters with limited screen time on the series or whose storylines needed additional explanation.<sup>[179]</sup>

Carpenter was not the first person asked to oversee the comic; Mark Verheiden, who co-wrote the one-off comic, was originally intended to be in charge of the bimonthly series. Verheiden's commitment to the TV series kept him from working on the comic books, so he asked Carpenter if he would take them on. Although the comic-book series was intended to expand on the TV series, there was an occasional continuity overlap because of differences in production schedule between the comic and the series. In one instance, the comic book showed Clark robbing an ATM and the season-three premiere showed him robbing multiple ATMs.<sup>[179]</sup> The comic-book series tied into the TV series, the *Chloe Chronicles* webisodes<sup>[180]</sup> and *Smallville*-related webpages,<sup>[179]</sup> with cast and crew interviews and information on the episodes' production.<sup>[178][181]</sup> The comic-book series ended in January 2005, with no comics published until the Season Eleven series debut.

## ***Smallville Season Eleven***

The first digital issue of a *Smallville Season Eleven* comic book was released on April 13, 2012; the first print issue was published on May 2, 2012.<sup>[182]</sup> In the comic book (written by *Smallville* executive story editor Bryan Q. Miller), set six months after Darkseid's attack, Clark no longer fights crime as "The Blur" but as "Superman". Although Clark is generally accepted by the public, some distrust him (including Lex Luthor, despite his memory loss after his encounter with Tess Mercer).<sup>[183]</sup> *TV Guide* reported that "Detective", a new series of adventures paralleling the TV series and the comic series' second arc, would be published digitally on the title's off-week beginning January 4, 2013. A new arc, "Effigy", would feature a team-up of recurring character John Jones and Batman.<sup>[184]</sup> DC Comics cancelled the series after nineteen issues at the end of the "Olympus" story

arc, with the rest of the season-eleven story continuing as miniseries under the *Season Eleven* banner.<sup>[185]</sup> On March 11, 2015, DC Comics ended the *Smallville Season Eleven* with story arc "Continuity", which serves as the finale of the television franchise.<sup>[186][187]</sup>

## Chloe Chronicles

Allison Mack's character, Chloe Sullivan, has starred in two promotional tie-in series: *Smallville: Chloe Chronicles*, and *Vengeance Chronicles*. Two volumes of *Chloe Chronicles* totaled eleven mini-episodes. In the first volume Chloe investigated events leading to the death of Earl Jenkins, who held Chloe and her friends hostage at the LuthorCorp plant in the first-season episode "Jitters". It aired from April 29 to May 20, 2003 to AOL subscribers.<sup>[189]</sup> After the first volume received positive responses from viewers, the second volume was created as a continuation with Sam Jones III as Pete Ross. This volume used the *Smallville* comic books as a secondary tie-in to the series. Viewers could watch *Smallville*, *Chloe's Chronicles* and finish with the *Smallville* comic book, which would provide an "enhanced backstory to the online segments".<sup>[190]</sup> The later series, *Vengeance Chronicles*, is a spinoff of the fifth-season episode "Vengeance". In this series Chloe joins a costumed vigilante, whom she calls the "Angel of Vengeance", to expose Lex Luthor's Level 33.1 experiments on meteor-infected people.<sup>[191]</sup>

The idea for an online show about Chloe originated with Mark Warshaw, who ran the show's website and was in charge of the DVDs. The series intended to wrap up "unfinished business" from the television show.<sup>[192]</sup> Although *Smallville: Chloe Chronicles* began on AOL, it made its way to the United Kingdom's Channel 4 website.<sup>[192]</sup> According to Lisa Gregorian, senior vice president for television of Warner Bros. Marketing Services, "Our goal is to create companion programming that offers new and exciting ways to engage the audience, just as music videos did for record promotion."<sup>[189]</sup> Allison Mack described the show as "very Nancy Drew and mysterious": "I think it's a bit more like *The X-Files* or *NYPD Blue*. The Chronicles are like a detective story, with Chloe following clues and interviewing people, going from spot to spot, figuring things out."<sup>[192]</sup> The scripts were written by Brice Tidwell; Mack was given script approval for the series, allowing her to review and make changes to the script. Warshaw communicated with Gough and Millar to expand *Smallville* stories in *Chloe's Chronicles*.<sup>[192]</sup>

## Promotional tie-ins

For the season-three premiere, the *Smallville* producers teamed up with Verizon to enable its registered users to view plot updates (as *Daily Planet* press releases), quizzes and games related to the show with Verizon product placement.<sup>[193]</sup> *Smallville Legends: The Oliver Queen Chronicles*, a six-episode CGI series chronicling the early life of Oliver Queen, was released in a promotional tie-in with Sprint. According to Warner Bros. Television Group executive vice-president of worldwide marketing Lisa Gregorian, the promotional tie-ins got fans more connected to the show.<sup>[194]</sup> On April 19, 2007 a tie-in with Toyota promoting the Yaris featured an online comic strip, *Smallville Legends: Justice & Doom*, as an interstitial program during new *Smallville* episodes.<sup>[195]</sup> The interactive comic was based on the "Justice" episode, which follows Oliver Queen, Bart Allen, Victor Stone and Arthur Curry (the initial members of the "Justice League" in *Smallville*) as they seek to destroy LuthorCorp's secret experimental labs. The online series allowed viewers to investigate with the fictional team to win prizes. Stephan Nilson wrote all five episodes, working with a team of artists on the illustrations. Nilson received the plot for each comic episode as *Smallville*'s production crew was filming its current television episode. Artist Steve Scott drew comic-book panels which were sent to Motherland, a consulting group. Motherland reviewed the drawings, telling Scott which images to draw on a separate overlay; this allowed objects to be moved in and out of a frame.<sup>[196]</sup>

In 2008 The CW joined the manufacturers of Stride gum to give viewers an opportunity to create their own *Smallville* digital comic, *Smallville: Visions*.<sup>[197]</sup> The writers and producers developed the comic's beginning and end, allowing viewers to provide the middle. The CW began its tie-in campaign with the March 13, 2008 episode "Hero", where Pete develops superhuman elasticity after chewing kryptonite-infused Stride gum. On The CW's website, viewers voted on one of two options (each adding four pages to the comic) every Tuesday and Thursday until the campaign ended on April 7.<sup>[198]</sup> In season seven *Smallville* again worked with Sprint, bringing its customers "mobisodes" entitled *Smallville Legends: Kara and the Chronicles of Krypton* with Clark's cousin Kara.<sup>[199][200]</sup>

## Spin-offs

Gough and Millar developed an *Aquaman* pilot for The WB, with Justin Hartley as *Aquaman* (Arthur Curry).<sup>[201]</sup> As work progressed on the *Smallville* season-five episode "Aqua", although the episode was not intended as a backdoor pilot for an *Aquaman* spin-off<sup>[202]</sup> the character was seen as having potential for his own series.<sup>[203]</sup> Alan Ritchson was not considered for the role in the new series, because Gough and Millar did not consider it a *Smallville* spin-off. Gough said in November 2005, "[The series] is going to be a different version of the 'Aquaman' legend"<sup>[203]</sup> and suggested a crossover with *Smallville* at some point.<sup>[204]</sup> Although the pilot was given a good chance of being picked up, when The WB and UPN merged into The CW the new network passed on the show.<sup>[205][206][207]</sup>

During the sixth season there was talk of spinning off the Green Arrow into his own series, but Hartley refused to talk about the possibility of a spin-off because of his role on *Smallville*. The actor felt it his duty to respect what the show had accomplished in five seasons, and not "steal the spotlight" because there was "talk" of a spin-off after his two appearances. According to Hartley, "talking" was as far as the spin-off idea ever got.<sup>[208]</sup>

## Merchandise

Since *Smallville* began airing, a variety of merchandise connected with the series has been produced. Two soundtrack albums of songs from the show have been released. On February 25, 2003 *Smallville: The Talon Mix*, with a group of artists who licensed their music for the show, was issued.<sup>[258]</sup> *Smallville: The Metropolis Mix*, with another group of artists, was released on November 8, 2005.<sup>[259]</sup> In addition to the soundtracks, action figures, T-shirts, hats and posters have been produced.<sup>[260]</sup> In December 2002 autographed *Smallville* merchandise was listed for auction on eBay, with the proceeds going to charity.<sup>[261]</sup> In 2003, Titan Magazines began publishing a monthly *Smallville* magazine with cast and crew interviews, information on *Smallville* merchandise and photos. The 34th and final issue was published in November 2009.<sup>[262]</sup>

Titan Books published companion volumes for each season with cast and crew interviews, episode descriptions and behind-the-scenes photos. On September 1, 2004, the company published its first companion for the series.<sup>[263]</sup> Written by Paul Simpson, the book has sixteen pages of color photos of the cast.<sup>[264]</sup> On March 1, 2005 Titan Books published its season-two companion, also written by Simpson,<sup>[265]</sup> which details the series' special effects.<sup>[266]</sup> Titan published the third-season companion on September 1,<sup>[267]</sup> the last written by Simpson. He described the episodes' plots, discussing the neglect of the Martha Kent character and the failure of the Adam Knight storyline.<sup>[268]</sup> Titan Books released the fourth-season companion by Craig Byrne, who wrote the subsequent companion books, on September 4, 2007.<sup>[269]</sup> It contains interviews with the cast and crew and color photos of the production.<sup>[270]</sup> Titan published the season-five companion on December 26, 2007.<sup>[271]</sup> The season-six companion, with an introduction by Justin Hartley, was published on March 25, 2008.<sup>[272]</sup> The season-seven companion (Titan's last) has a foreword by Laura Vandervoort, a reflection on the "*Smallville* phenomenon" and a discussion of Gough and Millar's departure.<sup>[273]</sup>

In 2010, the *Smallville Roleplaying Game* was released by *Margaret Weis Productions* using its *Cortex Plus* System. Using the series' season-nine setting, it includes rules for earlier seasons. Two supplements, the *High School Yearbook* and the *Watchtower Report*, were produced. Players can play the characters from *Smallville*, or create their own spin-off of the series.<sup>[274]</sup> On May 15, 2013 *Ultimate Smallville Soundtrack*, a five-CD box set with 100 songs from the series' 10 seasons, was released by Vicious Records with all profits benefiting the *Christopher and Dana Reeve Foundation*.<sup>[275]</sup>
